New York, NY 10017

Dear Mr. Rowan:

In your column--you seem to ridicule those who say the Warren (Ford) Commission was a bedamned lie? "You don't accuse people or governments of murder unless you can prove it"--but deductive sequential evidence does prove it, and putting testimony of all those in position to know from Angleton and Colson to un-named C.I.A. agents also proves it.

The fault lies in the media for news being unwilling to persue the truth--it is too shocking and horrible to be admissible--even the Supreme Court is involved since May 1974 in the cover-up.

The modus-operendi is hypnotism used by secret police in the Lincoln case--and not admissible in court because it would upset the entire judicial system to admit the truth that you or any one can be hypnotized under proper circumstance to do anything, including suicide. James Earl Ray has no idea why he did it--as an example.

You say Liddy and Hunt were in Dallas--how about that charter member of the C.I.A., the great Commie hunter himself in person, R.M.N.? Are you afraid to mention that--Earl Golz (Dallas Morning News) wasn't and a lot of other stuff too, although 100 people have been eliminated in regard to this.

Sincerely,

Chas. A. Spears
